

Performance and HEDIS Measures

Child Welfare Specialty Plan

HEDIS Measures

- The Healthcare Effectiveness Data and Information Set (HEDIS) is a tool used by more than 90 %of health plans to measure performance on important dimensions of care and service.
- The National Committee for Quality Assurance (NCQA) developed HEDIS in order to measure healthcare outcomes consistently among different plans.

HEDIS Measures (cont.)

- Staff who provide behavioral health and medical care coordination services for enrolled members are responsible for ensuring that children receive the services they need to achieve positive outcomes.
- Care Coordinators are responsible for reviewing care gaps and following up with case workers, parents and caregivers to ensure members are getting their required medical, dental and behavioral health services.

HEDIS, AHCA and Core Set Measures

HEDIS, AHCA and Core Set Measures*

| | |
|--|---|
| Well-Child Visits (WCV, W30, AWC, W15, W34) | Childhood Immunizations (CIS) |
| Immunizations for Adolescents (IMA) | Screenings: Lead (LSC), Chlamydia (CHL), Depression (CDF-CH), Developmental (DEV-CH) |
| Follow up for Children Prescribed ADHD Medication (ADD) | Medication Management for People with Asthma (MMA) |
| Contraceptive Care (CCW-CH) | Prenatal/Postpartum Care (PPC) |
| Follow-Up Hospitalization/ED, MH-7 Day (FUH) | Follow-Up After ED Visit for Mental Illness - 7-Day (FUM) |
| Follow-Up After ED Visit for Alcohol and Other Drug Abuse or Dependence - 7-Day (FUA) | Initiation and Engagement of Alcohol and Other Drug Abuse or Dependence Treatment – Initiation (IET) |

*List of Key Measures does not include all contracted measures or descriptions. Please refer to the Sunshine Health-CBCIH Vendor Agreement, for the full list of measures and the Sunshine Health, Quick Reference Guide-2020, for all HEDIS measure descriptions.

Wellness Measure Overview

Well-Child Visits

- ❖ Comprehensive well care visits need to include:
- ❖ Health history
- ❖ Physical developmental history
- ❖ Mental developmental history
- ❖ Physical Exam
- ❖ Health Education/Anticipatory Guidance

CIS – Childhood Immunizations

- Percentage of children 2 years old who had four diphtheria, tetanus and acellular pertussis (DTaP); three polio (IPV); one measles, mumps, rubella (MMR); three haemophilus influenza type B (HiB); three hepatitis B (Hep B), one chicken pox (VZV); four pneumococcal conjugate (PCV); one hepatitis A (Hep A); two or three rotavirus (RV); and two influenza (flu) vaccines by their second birthday.

Wellness Measure Overview

IMA – Immunizations for adolescents

- Percentage of Adolescents 13 yrs. of age who had one dose of Meningococcal vaccine and one tetanus, diphtheria toxoids and Tdap or one tetanus, diphtheria toxoids vaccine (Td) by their 13th birthday.

Screening Measure Overview

LSC – Lead screening in children

- Percentage of children 2yrs of age who had one or more capillary or venous lead blood test for lead poisoning by their 2nd birthday.

CHL – Chlamydia screening for women

- Percentage of women 16 – 24 yrs who were identified as sexually active and who had at least one test for chlamydia during measurement year.

CDF-CH – Screening for Depression and Follow-Up Plan

- Annual screening, ages 12-17, for depression, including plan for follow-up.

DEV-CH – Developmental Screening

- Developmental screening within the first three years of life.

Medical and Behavioral Health Measures

ADD – Follow up for children prescribed ADHD medication

- Covered Persons age 6-12 years who were dispensed ADHD medication, and had an initial follow up visit within 30 days and a subsequent follow up visit within 270 days (9 months) .

MMA – Medication Management for People with Asthma

- Percentage of members 5-64 yrs during measurement year who were identified as having persistent asthma and who were appropriately prescribed medications during the measurement year.

CCW-CH – Contraceptive Care

- Percentage of women aged 15-20 years at risk of unintended pregnancy that is provided a most effective (i.e., sterilization, contraceptive implants, intrauterine devices or systems (IUD/IUS)) or moderately effective (i.e., injectables, oral pills, patch, ring, or diaphragm) method of contraception.

Medical and Behavioral Health Measures

PPC – Prenatal and post-partum care

- Prenatal: Percentage of deliveries of live births between November 6th of year prior to the measurement year and Nov 5th of measurement year.
- Postpartum: Percentage of deliveries that had a postpartum visit on or between 7-84 days after delivery.

FUH – Follow-up after hospitalization for mental illness

- Percent of acute care facility discharges for enrollees who were hospitalized for a mental health diagnosis and were discharged to the community and were seen on an outpatient basis by a mental health practitioner within 7 days (each discharge is counted in the denominator i.e. multiple encounters possible per enrollee).

FUM– Follow-Up After ED Visit for Mental Illness - 7-Day

- The percentage of ED visits for which the member, (age 6 years or older with a principal diagnosis of mental illness or intentional self-harm) received follow-up visit for mental illness within 7 days of the ED visit (8 total days).

Medical and Behavioral Health Measures

FUA – Follow-Up After ED Visit for Alcohol and Other Drug Abuse or Dependence - 7-Day

- The percentage of women aged 15-20 years at risk of unintended pregnancy that is provided a most effective (i.e., sterilization, contraceptive implants, intrauterine devices or systems (IUD/IUS)) or moderately effective (i.e., injectables, oral pills, patch, ring, or diaphragm) method of contraception.

IET– Initiation and Engagement of Alcohol and Other Drug Abuse or Dependence Treatment – Initiation

- The percentage of adolescent and adult members with a new episode of AOD abuse or dependence who initiate treatment through an inpatient AOD admission, outpatient visit, intensive outpatient encounter, partial hospitalization, telehealth or medication assisted treatment (MAT) within 14 days of the diagnosis.
